

Smart Assays Biotechnologies Ltd.

Quality Policy

Smart Assays Biotechnologies Ltd. provides customized R&D services for biotechnology & pharmaceutical companies. These range from scientific due diligence and maturation of early stage projects to unique R&D services for advanced companies. Our aim is to achieve the level of performance that meets internal standards and our customers' requirements.

Smart Assays has adopted a quality management system (QMS), and has designated a quality manager, in order to establish, implement and maintain the relevant procedures. Top management and all employees are committed to the culture of quality and to the continual improvement of the company's quality systems, processes and services. Annual quality objectives as well as the effectiveness of QMS will be reviewed and addressed by management at least once a year during management review meetings.

The top management of *Smart Assays* conforms to compliance and requirements as mandated by the laws of the State of Israel, by International quality standards, its customers and the company itself.

This quality policy will be distributed, understood and practiced by all employees in the organization. This policy will be available to anyone of interest, whenever appropriate.

This quality policy will be revised at least once a year during management review meetings in order to ensure its suitability.
